## PROFILE

Junior Full-Stack Web Developer with 2 years of experience, combining creativity to deliver user-centered solutions. Passionate about building digital experiences. Collaborative, constantly seeking innovation and professional growth.

## EXPERIENCE

### E-commerce Web Application

**Technologies:** React, JavaScript, HTML5, CSS3, TailwindCSS, REST API

- Developed a web e-commerce application allowing users to browse products, add them to the cart, and simulate purchases.
- Implemented responsive design and interactive features such as filtering, search, and cart management to enhance user experience.
- Integrated a REST API for dynamic product retrieval.
- Managed the project using Git and GitHub.
- <https://acommer.netlify.app/>

### Pokédex Web Application

**Technologies:** React, JavaScript, HTML5, CSS3, UI/UX Design

- Built a Pokédex web app integrating PokeAPI to dynamically fetch and display Pokémon data.
- Designed the UI/UX, creating an intuitive, visually appealing interface focused on user experience.
- Structured smooth navigation with clear hierarchy and visual components for better interaction.
- Handled the entire project development and version control with Git and GitHub, ensuring an organized workflow.
